

Mtida

Help Pages

Vista Operating System Setting up Windows Mail

Click Tools>Accounts>then click the Add button on the right.

Select e-mail account then click Next.

Display Name: type in your name as you would usually write it (i.e. John Smith)

E-mail address: username@mtida.net

Incoming Mail Server (POP3) type the following in the box:
mail.mtida.net

Outgoing Mail SMTP server type the following in the box:
mail.mtida.net

Put a check mark in front of "My Server Requires Authentication".

Type the account name as your entire email address. The username will be there, so just add @mtida.net.

Type in your password and then put a check in front of "Remember Password"

Click Next and on the last screen click Finish to save the settings.

Now, click on Tools>Options>Security Tab

Remove the check from in front of "Do not allow attachments to be saved or opened that could potentially be a virus."

Click the connection tab and remove any check marks on this page, if any.

Click on Apply and then OK.
